

High-Oil Corn GT

Designed to Grow. Made to Attract.

Makes the Deer Go Crazy!

High-oil corn delivers higher energy, protein, and fat – making it the ultimate attractant and feed source for deer and other wildlife. Even small plots can make a big impact when planted with Buck Head Wildlife's nutrient-dense, high-oil corn.

Product Overview

Buck Head Wildlife High-Oil Corn packets are perfect for smaller plots, test areas, or backyard wildlife setups. This high-oil hybrid brings the same premium attraction and nutrition of our full-size bags in a compact, easy-to-plant size. Designed for versatility and proven performance, it produces tall, sturdy plants with excellent ear flex and high oil content that keeps deer coming back.

Key Features

- High-Oil Hybrid – Enhanced fat and calorie levels for improved energy and attraction.
- Medium-Tall Plant Height – Strong field presence and dependable standability.
- Good Ear Flex – Produces large, full ears even under variable conditions.
