

# High-Oil GT Blend

## Designed to Grow. Made to Attract.

### Makes the Deer Go Crazy!

Buck Head Wildlife's High-Oil GT Blend is a powerhouse combination designed to fuel attraction and nutrition from planting to late season. This 100% glyphosate-tolerant blend brings together the energy of high-oil corn and the protein of soybeans - a proven mix for drawing deer and improving overall herd health.

@buckheadwildlife

### Blend Composition

- 30% GT High-Oil Corn
- 70% GT Soybeans
- 100% Glyphosate Tolerant Mixture
- 1 Bag (approx. 35-50 lb) plants approximately 1 acre

### Planting Information

- Planting Depth: Approximately 2 inches
- Seeding Method: Can be broadcast or drilled
- Use a hot wire around your plot during the growing season for best protection
- For optimum results, plant in well-drained soil with full sunlight exposure

### Performance Benefits

- Combines high energy from high-oil corn with protein from soybeans
- Excellent standability and growth through varying soil conditions
- Promotes herd health, body weight, and antler growth
- Proven in the field - consistent attraction throughout the season

### Endorsed by Tony LaPratt

"There's not much I haven't seen in the whitetail world, but this high-oil corn is truly a game-changer!" - Tony LaPratt, Ultimate Land Management & Whitetail Boot Camp

"#1 deer attractant in all our food plots!"
